### DETAILED ACTION

**Please note:** The number of Art Unit 1627 has been changed to 1639. Please direct all correspondence for this case to Art Unit 1639.

**Also Note:** In an effort to enhance communication with our customers and reduce processing time, Group 1639 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

1. The Preliminary Amendment is noted. Claims 1-30 were cancelled and claims 31-50 were added and are currently pending.

#### *Election/Restriction*

2. Election from the following species is required. Please elect one species from *each* subgroup below. There are *three* (3) subgroups.

##### Subgroup 1: Specific library of compounds made

Applicant is required to elect, for purposes of search, a *specific* library that is made by the claimed method. The election should result in the identification of all of the specific structures of the members of the library. See also Subgroups 2 & 3 below.

##### Subgroup 2: Heterocyclic scaffold used

Species 2-1: Purine

Species 2-2: Pyrimidine

**\*\***After election of the general type of heterocyclic scaffold from 2-1 and 2-2 above, a specific scaffold should be elected from those set forth in the claims (e.g. claim 34).

Subgroup 3: First contacting step

Species 3-1: Substituents directly attached to scaffold (e.g. claim 31)

Species 3-2: Substituents attached to scaffold via a tether moiety (e.g. claim 38)

\*\*Claims 45-50 will be examined to the extent that they read on the elected species above.

3. The species are distinct, each from the other, because the structures and modes of action of the library compounds are different. The library compounds would also differ in their reactivity and the starting materials from which they are made. Thus the specific steps and elements needed for carrying out each of the methods is different. Therefore, the species have different issues regarding patentability and represent patentably distinct subject matter.

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

7. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maurie Garcia Baker, Ph.D. whose telephone number is (703) 308-0065. The examiner can normally be reached on Monday-Thursday from 9:30 to 7:00 and alternate Fridays.

10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew J. Wang, can be reached on (703) 306-3217. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4242. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
